DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 2, 7, 9, 41, 42, 51-57, 62, 63, 66, 68 and 69 are rejected under 35 U.S.C. 102(e) as being anticipated by Araki et al.

The rejection is applied as stated in the office action mailed 2/12/02.

Araki et al. disclose forming source and drain regions laterally proximate the floating gate (Col. 4, lines 63-67).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6, 8, 10-14, 25-31, 43-50, 58-61, 64, 65, 67 and 70-71 are rejected under 35 U.S.C. 103(a) as being unpatentable over Araki et al. as applied to claims 1, 2, 7, 9, 41, 42, 51-57, 62, 63, 66, 68 and 69 above, and further in view of the stated examiner's comments.

The rejection is applied as stated in the office action mailed 2/12/02.

Response to Arguments

In response to applicant's argument A in page 22 that Araki et al. does not disclose forming a transistor, applicant is directed to the Office Action mailed 7/26/02, page 3. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., transistor) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Furthermore, the reference discloses forming a transistor by implication through disclosure of "floating gate" and explicitly at Col. 4, lines 63-67.

Art Unit: 2823

In the office action mailed 7/26/02 arguments that the invention of claims 1,2,7,9,41,42,51-57,62,63,66 and 68 is not anticipated by Arkai et al., the examiner has modified a reference in a rejection under 35 USC 102(e), ignored claim limitations and applicant's remaining arguments are fully addressed.
